

**Critique of Programming Project 3: Rush Hour  
for Team 31: Joseph Grosspietsch and Alfred Joseph**

**Written by Bryan Spahr and George Saldaña**

### **Supporting Documents (Score: 5/5)**

The supporting document accurately conveys the usage and design of the program, including what data structures were used.

### **Program Style (Score: 2/5)**

Code indentation is very inconsistent. Blocks of code are not organized neatly. NO COMMENTS AT ALL.

### **Use of Objects, Data Structures and Algorithms (Score: 3/5)**

Runtime and algorithm efficiency is unknown due to lack of comments. 3/5 assuming program works.

### **Code/Object Decomposition (Score: 4/5)**

Functions seem to be used efficiently. Source code is in one file.

### **Overall View of the Project (Score: 2/5)**

Impossible to understand program without comments.
